Program Overview

The Digital Marketing Mastery Program is a comprehensive 20-week professional training designed specifically for the Mauritian market.

It bridges the gap between theory and real-world execution, equipping professionals with the skills to drive measurable business results through digital channels.

Weekly session (4 Hours each) + Weekly Assignments + Capstone Project

Marketing Professionals, business owners, managers & Career changers

What's fun – Delivered in multiple languages

What You'll Achieve

- Build a complete digital marketing skill set — from SEO to AI-powered campaigns
- Manage and optimize paid media campaigns across Google and Meta platforms
- Use data and analytics to make smart, ROI-driven decisions
- Leverage Artificial Intelligence to accelerate your marketing performance
- Design and present a full digital strategy for a real-world business
- Master content marketing, social media strategy, and cross platform strategy.
- Understand marketing automation, CRM integration, and funnel optimization
- Build a professional portfolio of real campaign work and case studies

Program Architecture

Weeks 1-4

1

Digital Foundations

Ecosystem, Analytics, SEO, Content Strategy

Weeks 11-16

3

Advanced Performance & AI

Data Analysis, ROAS Optimization, AI Tools, Automation, E-commerce

Weeks 5-10

2

Core Channels & Paid Media

Social Media, Google Ads, Meta Ads, Display, Email

Weeks 17-20

4

Strategy & Leadership

Digital Strategy, Reporting, Personal Branding, **Capstone Project**

What is Marketing?

What is Marketing?

In Simple Terms

Marketing is the process of getting people interested in your company's product or service.

It involves **market research** (understanding who the customer is), **strategy** (defining how to reach them), and the **4 Ps**: Product, Price, Place, Promotion.

Source: Foundations of Marketing course material

Official Definition — AMA

Marketing is the activity, set of institutions, and processes for **creating, communicating, delivering, and exchanging offerings** that have value for customers, clients, partners, and society at large.

American Marketing Association

The 4 Ps of Marketing

P₁

Product

What you offer — goods, services, or ideas of value.

P₂

Price

What the customer pays to acquire it.

P₃

Place

Where & how it reaches the customer.

P₄

Promotion

How you communicate value to reach them.

How Marketing **Started?**

Before the digital revolution, marketing relied on **mass-media channels** — broadcasting one message to a very wide audience.

A Key Channels

Mass-media channels that defined a generation of advertising.

- **TV commercials**
- **Radio spots**
- **Newspapers**
- **Magazines**
- **Billboards**
- **Direct mail**

B Characteristics

What defined the old-media marketing model.

- 1 One-way communication**
Pure broadcasting — no audience response.
- 2 Broad audience targeting**
Reached everyone, not the right one.
- 3 High production costs**
Premium spots, large agency budgets.
- 4 Difficulty tracking ROI**
Limited ability to measure exact return.

Why Marketing Is Important

Marketing creates the bridge between what a business offers and what a customer values — turning attention into trust, and trust into growth.

Value Creation

Translates a product into a meaningful benefit a real customer is willing to pay for.

Brand Visibility

Earns attention in a crowded world so the right people see you at the right moment.

Customer Insight

Listens to behaviour, needs, and pain points — the raw material of better products.

Demand Generation

Turns interest into intent — pipeline, leads, and a predictable flow of new customers.

Trust & Authenticity

Builds credibility — the currency that decides who customers buy from again.

Sustainable Growth

All of the above compound — marketing is how a brand scales beyond its first customer.

What is Digital Marketing?

Digital marketing uses **online channels** to reach the right customer with the right message — and unlike traditional media, every step is **measurable, targeted, and adaptable**.

Why It Wins

Three advantages traditional media could never deliver.

01 Measurable

Track impressions, clicks, conversions, and ROI in real time — every spend tied to a number.

02 Targeted

Reach a precise audience by intent, behaviour, and context — not by guessing demographics.

03 Adaptable

Test, learn, and optimise mid-campaign — you don't have to wait for the next print run.

Mauritius Digital Marketing Landscape

A high-connectivity, mobile-first market with growing digital commerce behaviour — the foundation every campaign in Mauritius rests on.

Audience & Connectivity • Late 2025

Digital Commerce Behaviour

Takeaway

Mauritius is a high-connectivity, mobile-first market with measurably accelerating digital commerce behaviour.

Meta & Google Opportunity in Mauritius

Where the addressable audience already lives — and where intent is captured before the purchase.

• Meta Audience — Ad Reach in Mauritius, Late 2025

• Search Engine Share — Mauritius

Strategic Read

The platform opportunity is real, even where local spend data isn't public.

Statista describes **Search Advertising** and **Social Media Advertising** in Mauritius as experiencing considerable growth, driven by internet penetration, mobile usage, and rising digital marketing investment — even where exact local spend figures aren't openly published, audience scale and search dominance make the strategic case on their own.

Digital Marketing & AI in 2026

Five shifts redefining how brands grow, compete, and create value according to Deloitte and Google.

60%

of consumers say social content, recommendations or communities influence brand discovery

43%

of brand interactions are perceived as personalised — a measurable trust gap

83%

of global consumers use Google and/or YouTube daily — the new discovery engine

Sources

Deloitte Digital 2026
Think with Google • Ipsos

01

AI as the marketing operating system

Generative AI now produces customer-ready output — time to move from experiments to end-to-end automated workflows.

Deloitte 2026

02

ROI & the end of blind spend

CFOs demand measurable returns. CMOs who speak in revenue attribution and customer value will earn the budget.

Deloitte 2026

03

Trust & authenticity become assets

In an AI-saturated world, brands that deliver on measurable commitments command loyalty — not just promise it.

Deloitte 2026

04

Discovery becomes conversational

AI search reshapes intent — lean into Generative Engine Optimisation with a rich library of authoritative assets.

Think with Google

05

Personalisation & participation rise

Audiences expect to co-create, remix, and participate — brands must build worlds, not broadcast campaigns.

Think with Google

The Consumer Journey

Four stages every campaign must orchestrate, from first impression to lasting advocacy.

Four Stages • What to Build, Channel by Channel

Awareness *discovering the brand*
Capture attention where curiosity starts , cast a wide, branded net.
CHANNELS • Social reach, display, video, influencers, PR

Consideration *evaluating options*
Earn trust as the buyer compares — answer questions, surface proof.
CHANNELS • SEO, content, retargeting, email nurture, reviews

Conversion *taking action*
Remove friction at the moment of decision — make saying yes effortless.
CHANNELS • Paid Search, Paid Social, landing pages, checkout, abandonment, offers

Loyalty *repeat purchase & advocacy*
Turn one buyer into many the cheapest customer to acquire is the one you already have.
CHANNELS • CRM, loyalty programs, referrals, community, lifecycle email

The Full Digital Marketing Channel Mix

Every modern brand orchestrates three media types in concert — reach you *buy*, channels you *build*, and visibility you *earn*.

Three Pillars • One System

Paid Media media you pay for

Fast reach, targeted delivery, measurable performance — you control the dial on the volume.

Owned Media channels you control

Brand-consistent assets that compound over time — your house, your rules, your first-party data.

Earned Media visibility you earn

Coverage, recommendations, and organic amplification — the credibility paid media can't buy.

Insight

High-performing brands don't pick one — they orchestrate Paid + Owned + Earned as a single system.

01

Pillar 01 • Channel Mix

Paid Media

Media a brand **pays for** to drive reach, traffic, leads or sales — the fastest lever in the marketing toolkit.

Core Channels

Google & Search Ads

Capture high-intent traffic at the moment of search.

Meta & Social Ads

Facebook, Instagram, LinkedIn — granular audience targeting at scale.

YouTube & Video Ads

Brand-building reach with measurable view-through and intent.

Display & Programmatic

Banner inventory bought automatically across millions of sites.

Sponsored Content & Influencer Partnerships

Paid placements on creator and publisher channels — native, contextual reach.

• Why It Wins

Strengths of paid media.

- 01 Fast Reach**
Turn the dial on and audiences appear within hours, not weeks.
- 02 Precise Targeting**
Reach by intent, behaviour, geography, life stage — not guesswork.
- 03 Scalable Performance**
Spend up on what works, down on what doesn't — predictable growth.
- 04 Measurable ROI**
Every impression, click and conversion is attributable to a number.

02

Pillar 02 • Channel Mix

Owned Media

Channels the brand **controls directly** — assets that compound into long-term equity and first-party data.

Brand-Controlled Channels

Website

Your digital headquarters — every campaign lands here.

Blog / Content Hub

SEO-fuelling articles that answer customer questions.

Email Database

A direct line to opted-in subscribers — the highest-ROI channel.

CRM & Automation

Personalised journeys driven by your own customer data.

Mobile App

Persistent presence on the customer's home screen.

Brand Social Pages

Followers, communities, and brand voice consistent and yours.

• Why It Wins

Strengths of owned media.

- 01 Full Control**
No algorithm changes can throttle you overnight.
- 02 Brand Consistency**
Voice, design, and message stay on-brand by default.
- 03 Long-Term Asset Building**
Every blog, email and page compounds in value.
- 04 First-Party Data**
Customer signals you own — the currency of modern marketing.

03

Pillar 03 • Channel Mix

Earned Media

Visibility **earned through others** — advocacy, organic amplification, and the credibility paid media can't buy.

What Earned Media Looks Like

PR Coverage

News features and editorial mentions.

Reviews & Testimonials

Google, Trustpilot, app store, in-product.

Influencer Buzz

Unpaid creator conversations and communities.

Word of Mouth

Friend-to-friend recommendations.

Organic Shares

Reshares and mentions you didn't pay for.

SEO & Backlinks

Authority signals other sites give you.

Why It Wins - Strengths

- **Trust**
Third-party voice > brand voice
- **Credibility**
Independent endorsement
- **Social Proof**
"Others chose this brand"
- **Amplification**
Audiences carry the message

SMART Marketing Objectives

Turn vague ambitions into trackable goals — the framework every modern marketer plans against.

S

Specific

Define exactly what, who, and where — no vague language.

Ask: what exactly?

M

Measurable

Attach a number — if you can't count it, you can't manage it.

Ask: how much?

A

Achievable

Realistic given the budget, team, and timeframe at your disposal.

Ask: is it doable?

R

Relevant

Aligned to the actual business goal — not a vanity metric.

Ask: does it matter?

T

Time-bound

Set a deadline — an objective without a date is just a wish.

Ask: by when?

Example • From Vague to SMART

Weak

×

“We need to grow our online sales.”

SMART

✓

“Increase online sales by 20% from first-time buyers in Mauritius within the next 6 months.”

Takeaway

A SMART objective answers five questions in one sentence — *what, how much, how, why, by when.*

Business Objectives Come First

Marketing objectives are derived from business goals — never from a list of channel tactics.

Align Objectives to Market Position

The right marketing objective depends on where the business is today — not on what worked last year.

01^{Stage} New / Emerging

Few customers know you exist. The job is to **be discovered, get tried, and earn the first cohort of buyers.**

Priority Objectives

- Brand awareness
- Demand generation
- Lead generation
- Trial & first-time use
- Early market share

Reality check

Chasing market share *without* enough investment usually fails. Phase the ambition.

02^{Stage} Growing

You have proof. The job is to **scale what works, make it more efficient, and capture more of the addressable market.**

Priority Objectives

- Scale qualified demand
- Improve conversion efficiency
- Grow market share
- Drive repeat purchase
- Expand into adjacent segments

Reality check

Efficiency matters as much as volume — CAC and conversion become center stage.

03 Mature / Leading

You're the reference brand. The job is to **deepen relationships, raise lifetime value, and defend the position you've built.**

Priority Objectives

- Retention & loyalty
- Profitability & margin
- Customer lifetime value (CLV)
- Premium positioning & brand strength
- Defend market share

Reality check

The biggest threat is complacency — loyalty needs investment too.

From Vague Goals to SMART Objectives

Most failed marketing plans share the same four mistakes. Fix them and your objective becomes executable.

Common Mistakes

1 **Confusing tactics with objectives**

“Post on social” is a tactic, not a goal.

2 **Setting unrealistic goals**

Ambition without budget or capacity to back it.

3 **Wrong fit for market position**

A new brand chasing what a mature leader does.

4 **No metric or timeframe**

Without a number and a date, it's a wish.

Before → After

Weak

“Do more social media.”

SMART

Increase qualified website traffic from social campaigns by 25% within 6 months.

Weak

“Get more customers.”

SMART

Generate 300 qualified leads per quarter and convert 10% into first-time customers.

Weak

“Gain market share fast.”

SMART

Increase aided brand awareness by 15% and acquire 500 first-time customers in the next 9 months.

Weak

“Improve customer loyalty.”

SMART

Lift repeat purchase rate from 22% to 30% among existing customers within 12 months.

Closing Takeaway

A good marketing objective is **strategic, measurable, and stage-appropriate** — tied to the business goal, sized to your market position, and dated.

What is a **KPI**?

A **measurable indicator** that tells you whether marketing is moving the business toward its objective , or not.

The Acronym

K
Key
the most important one

P
Performance
what marketing is delivering

I
Indicator
a number you can track

Don't Confuse These

Tactic

What you do. e.g. "Run a Meta ads campaign."

Activity Metric

What you produced. e.g. "15 posts published, 3 ads live."

KPI

What it delivered. e.g. "Cost per lead, conversion rate, qualified leads."

Worked Example

Objective: Generate leads → **KPIs:** Cost per Lead, Conversion Rate, Qualified Leads.

Definition
A KPI is a **measurable value** used to evaluate whether a marketing activity is succeeding against a business or campaign objective.

Takeaway

If a number doesn't tell you whether you're moving toward the objective, it's not a KPI — it's noise.

KPIs Must Match the Objective

Different objectives demand different yardsticks. Mismatch the KPI to the goal and you'll optimise the wrong thing.

Business / Marketing Objective		Primary KPIs to Track
 01 Awareness	→	ImpressionsReachCTRBrand-search lift
 02 Traffic / Engagement	→	CTRCPCSessionsEngagement rate
 03 Lead Gen / Conversion	→	CVRCPACost per LeadLead quality
 04 Revenue / Profitability	→	ROASCPALTVMargin contribution
 05 Retention / Loyalty	→	Repeat RateLTVChurn rateNPS

Rule Pick KPIs *after* the objective is set — never the other way around.

Core KPI Formulas

The seven formulas every digital marketer should know cold — a printable cheat sheet.

01 Impressions

Total number of times an ad or piece of content is **shown**.

Tracks: exposure volume (not quality).

02 CTR

$$\frac{\text{Clicks}}{\text{Impressions}} \times 100$$

Click-Through Rate — relevance signal.

03 CPC

$$\frac{\text{Spend}}{\text{Clicks}}$$

Cost Per Click — traffic acquisition cost.

04 CVR

$$\frac{\text{Conversions}}{\text{Clicks}} \times 100$$

Conversion Rate — landing-page efficiency.

05 CPA

$$\frac{\text{Spend}}{\text{Conversions}}$$

Cost Per Acquisition — the unit cost of one customer.

06 ROAS

$$\frac{\text{Revenue}}{\text{Ad Spend}}$$

Return on Ad Spend — commercial outcome of each €1 invested.

07 LTV

$$\text{Avg Order Value} \times \text{Purchase Frequency} \times \text{Customer Lifespan}$$

Lifetime Value — the long-term worth of a single customer.

Pro Tip

Always pair an *efficiency* KPI (e.g. CPA) with a *value* KPI (e.g. LTV) — cheap acquisition of bad customers isn't success.

Practical Exercises & Workshops

Your First Steps Into Real-World Digital Marketing

- Work in teams on fun, hands-on activities
- Explore how real Mauritian brands use digital tools
- Learn the basics of social media & online marketing
- No prior experience needed — we learn by doing!

Exercise 1 — Explore a Brand Online

What you'll do: Pick a Mauritian brand you know and explore how it shows up online , its website, social media, videos, and more.

Where to Look

**Website**

Visit the brand’s website. Is it easy to use? Does it look good on your phone?

**Facebook & Instagram**

Find the brand on social media. What kind of posts do they share? How many followers?

**TikTok & YouTube**

Does the brand post videos? Are they fun, creative, or informative?

**Google Search**

Google the brand. Does it appear on the first page? What do you see?

**Email & WhatsApp**

Have you received emails or WhatsApp messages from this brand? What did they say?

**Online Reviews**

Search for customer reviews on Google or Facebook. Are they mostly positive?

**Influencers**

Does the brand work with local influencers? Can you find any sponsored posts?

Pick a Brand **You Already Know**

Choose one brand from the list below that you use or see often. You'll explore how they market themselves online.

Telecom

Emtel, my.t

Banking

MCB, ABSA Mauritius, SBM

Retail

Winner's, Intermart, Courts Mammouth

Hospitality

Beachcomber, Sunlife, Constance Hotels

Fashion

Island Haze, Cottons

Automotive

Leal Group

Real Estate

Park Lane Properties

Simple Checklist: **What to Look For**

Go through each item below for your chosen brand. Write down what you find — even “nothing found” is a useful answer!

01

Website

Go to their website on your phone. Is it fast? Easy to find things?

02

Facebook / Instagram

Check their page. What do they post? How often? Do people comment?

03

TikTok / YouTube

Do they make videos? Are they entertaining or helpful?

04

Google Search

Search the brand name. What comes up first?

05

Emails / WhatsApp

Have they ever sent you a message or email? What was it about?

06

Customer Reviews

Look up what customers say about them on Google or Facebook.

07

Mobile App

Do they have an app? Try downloading it — is it useful?

08

Ads

Have you seen ads from this brand online? Where did you see them?

09

Influencers

Do local influencers talk about this brand? Can you find examples?

Exercise 2 — How Good **Is Their Online Presence?**

What you'll do: Pick your local brand and check how well they show up online. Use these simple questions as your guide.

Questions to Ask

- 

Does the website look good?
Check if it loads fast, looks modern, and works on your phone
- 

Is the branding clear?
Does the logo, colors, and style look the same on every platform?
- 

Do people interact?
Look at likes, comments, and shares on their social media posts
- 

Can you find them on Google?
Search the brand name and see if they appear on the first page
- 

Do they run ads?
Have you seen any of their ads on Facebook, Instagram, or YouTube?
- 

Is customer support easy?
Can you contact them on WhatsApp, Messenger, or a chatbot?
- 

Do they use anything creative?
Look for anything innovative — like AI chatbots, fun campaigns, or AR filters

Rate the Brand: Simple Scorecard

Give each business a score from 1 (poor) to 5 (excellent) for each category. Trust your instinct — there are no wrong answers!

Social Media	/5
Website	/5
Look & Feel (Branding)	/5
Customer Interaction	/5
Easy to Find on Google	/5
Total Score	/25

Let's Do the Maths Together!

Imagine This Scenario

You run a Facebook ad for a local shop.

You spend: Rs 10,000

People who clicked: 1,000

People who bought: 25

How much did each click cost?

$\text{Rs } 10,000 \div 1,000 \text{ clicks} = \text{Rs } 10 \text{ per click}$

What % of clickers actually bought?

$25 \text{ buyers} \div 1,000 \text{ clicks} \times 100 = 2.5\%$

Was the ad worth the money?

If each sale = Rs 800, then $25 \times \text{Rs } 800 = \text{Rs } 20,000$ earned!

Course Summary

Everything we covered in today's session — from foundations to hands-on practice.

01 ———

What is Marketing

The 4 Ps, old vs. digital media, why marketing matters

02 ———

Digital Marketing

Measurable, targeted, adaptable — three key advantages

03 ———

Mauritius Landscape

Local market data, Meta & Google opportunity, AI trends 2026

04 ———
